

1 Preface

[I: BT-LAH-4]

This Component Performance Specification (BT-LAH) is based on the structure of module 2 of the German Association of the Automotive Industry (VDA) Component Requirement Specification (www.vda-gmc.de) and describes component-specific requirements. Volkswagen standard VW 99000 includes the content of VDA module 1, which describes general project-related requirements for the performance of component development contracts.

[I: BT-LAH-13]

Text segments with identification numbers preceded by "A" are requirements the contractor must fulfill (e.g., [A: BT-LAH-1]). If the segment's ID starts with an "I", then this segment contains information about the Performance Specification. If a text-segment does not have an ID or has one that does not start with "A" or "I", then this is also a requirement.

1.1 General requirements

[A: BT-LAH-5]

This BT-LAH and VW 99000 including parts 1 to 4 define the basic scope of the contractor's performance obligations.

[A: BT-LAH-6]

This BT-LAH describes the performance specifications, requirements, and test conditions the contractor and the product to be developed must fulfill.

1.2 Confidentiality notice

[I: BT-LAH-1224]

Confidential. All rights reserved. No part of this document may be provided to third parties, or, reproduced without the prior written consent of the appropriate SEAT S.A. department. This document is available to contracting parties solely via the appropriate Procurement department.

The English translation is believed to be accurate. In case of discrepancies, the German version controls. The decimal sign in non-editable figures may be a comma or a point on the line. The decimal point is used consistently within the running text.
